

## Invest in the Australian property market

At Funding, we're more than Australia's leading short-term mortgage lender. We also offer tailored investment opportunities in the Australian property market. With our first mortgage investments secured by real estate assets, investors can enjoy stability and capital preservation, backed by our proven track record in lending.

## A history of confidence

Since our establishment in 2015, we've proudly maintained a strong track record with zero capital losses, having lent over \$799 million across 1,355 loans\*\*. Each loan has consistently met or exceeded its target return.

## Who are our borrowers?

Our borrowers are creditworthy property owners, investors, builders, and developers looking for fast and flexible finance solutions. Each loan is backed by a registered first mortgage over Australian real estate assets to offer greater security.

### Borrowers turn to Funding for short-term finance

- Property owners turn to Funding for bridging finance when securing a new property before selling their current one.
- Property investors choose Funding for renovations, sales, or quick investment property acquisitions without bank hassles.
- Builders and developers rely on Funding for house or townhouse projects, or securing properties for future development.

## Security and stability

Our borrowers' real estate assets serve as security for your investment. They hold valuable real estate assets and undergo assessments and have an exit strategy at the loan's conclusion.

## Creditworthy confidence

Our borrowers boast an average credit score of 767, indicating a strong history of timely debt repayment. This reduces the risk of default and provides added peace of mind for investors.

## First mortgage peace of mind

With a first charge over the borrower's real estate asset, your investment is protected. In the rare event of default, we can sell the property to cover the investment.
